

Pipeline protection and foundations

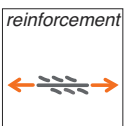

The compacted fill for foundations, traditionally executed in natural materials, can be advantageously and economically implemented by the **bontec® force SG** polypropylene or **HS** polyester woven sheet, enveloping ordinary materials available on site, for improved bearing capacity.

Our products

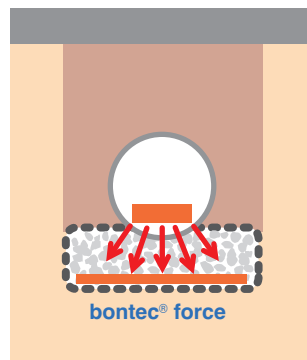

- **bontec® force HS or SG**
p.50, 51
- **bontec® Protec VNW**
p.47

Pipeline foundations

Polyester or polypropylene wovens:
bontec® force HS or SG ● reinforcement

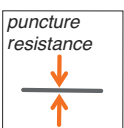

Our specifications

- ▲ **bontec® force HS or SG**
p. 111
- ▲ **bontec® protec VNW**
p. 111

Pipeline protection

bontec® protec VNW ● puncture resistance

bontec® protec VNW efficiently and economically protects pipelines and saves the sand traditionally used. The product is cut out on a made-to-measure basis in the factory to adapt to all diameters.
